***Reason for Allowance***

1. Regarding claims 1-21, the prior art fails to teach or suggest an apparatus for routing packets of digital data, comprising a controller, implemented in non-superconducting technology, that (a) chooses, based on the extracted destination information, one of the plurality of output ports, and (b) sends a control signal to the control input of the superconducting switch, wherein the control signal configures the superconducting switch to route the incoming data to the chosen output port, in combination with other limitations, as specified in the independent claims 1, and 13.

Regarding claims 22-25, the prior art fails to teach or suggest a method of routing a data packet through a switch having a plurality of output ports, the method comprises the steps of instructing the switch, before the delayed version of the data packet arrives at the switch, to route the delayed version of the data packet to the output port selected in the selecting step, wherein the extracting step is performed using superconducting circuitry, and the selecting step is performed using nonsuperconducting circuitry, in combination with other limitations, as specified in the independent claim 22.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
